

Zachary Gameiro

Burnaby, BC | zachary_gameiro@sfu.ca | linkedin.com/in/zachary-gameiro | github.com/zacharydagameiro | zacharydagameiro.github.io

TECHNICAL SKILLS

Front-End Development: React, TypeScript, JavaScript, HTML5, CSS, responsive UI implementation
UI Engineering: component-based design, state management, RTK Query, accessibility-aware development, interaction polish
Integrations: RESTful APIs, JSON data flows, Mapbox, third-party service integration, backend-connected UI workflows
Build & Delivery: Git, debugging, staged environments, CI/CD familiarity, mobile-first implementation
Languages: English, French, Portuguese

EDUCATION

Simon Fraser University Burnaby, BC
Bachelor of Science, Joint Major in Computing Science and Microbiology & Biochemistry Expected May 2027

WEB DEVELOPMENT PROJECTS

Haulr — Personal Project (Independent Build) 2026

React, TypeScript, Firebase, Stripe, Mapbox | Live Demo

- Built and shipped user-facing workflows across a multi-app SaaS platform, including public site, dashboard, and admin surfaces.
- Implemented role-aware UI patterns for quoting, scheduling, billing, and operational coordination in a live product.
- Integrated front-end flows with backend services and third-party tools to support real production use cases.

Meiro Tigan Website — Client Project 2025

React, responsive web design | Live Site

- Built a **responsive** lead-generation website and quote flow for a Lower Mainland concrete contractor.
- Implemented mobile-first service and contact interfaces focused on clarity, usability, and conversion-oriented structure.

PDB Structure Viewer — Personal Prototype 2025

- Prototyped a browser-based visualization tool for Protein Data Bank files with helix/sheet rendering and secondary-structure annotation.
- Explored parsing and rendering tradeoffs to keep interactive molecular visuals responsive in the browser.

ACADEMIC PROJECTS

SMLM Clustering with Graph Embeddings — School Team Project 2025

Python, PyTorch, MIRO, DBSCAN, HDBSCAN | GitHub

- Co-built a visualization-adjacent data pipeline that transformed complex scientific inputs into interpretable clustering outputs.
- Worked in a team setting to evaluate outputs and iterate on pipeline behavior across experiments.

Ferry Terminal Booker — School Team Project 2025

C, File I/O, Disk Storage, CLI | GitHub

- Co-built a terminal-based booking system with disk-backed storage, search flows, and operator-focused workflows.
- Implemented validation and update logic that kept user interactions and stored records consistent.

EXPERIENCE

BCLDB — Consultant Aug 2025 – Present

- Communicated with customers and teammates in a high-volume, policy-driven retail environment with strict verification requirements.
- Handled process-critical workflows with consistency, attention to detail, and strong service discipline.

Sherwood Park Toyota — Online Sales & Marketing May 2024 – Aug 2024

- Managed customer-facing communication and digital workflows in a fast-paced sales environment.
- Built internal process automation to reduce repetitive work and improve consistency across documentation steps.
